

Benefits of Building an ENERGY STAR® Home

An ENERGY STAR® labeled home gives you peace of mind knowing that it meets strict energy efficient guidelines.

Lower Energy Costs

Compared with standard qualified homes use substantially less energy for heating, cooling, and water heating and can save up to \$400 annually.

Saving on a New Construction Loan

Financing the construction of a home using an energy efficient mortgage can also lead to savings.

Better Energy-Performance

An energy-efficient home helps ensure consistent temperature between and across rooms, improves indoor air quality and delivers better protection against cold, heat, drafts, pollution, and noise.

Smart Investment

Building a home that is ENERGY STAR® qualified will have an increasingly valued feature when it comes to sell.

Environmental Protection

Simply put, the less we use in our homes, the less air pollution we generate. Energy Star labeled homes use less energy.
